USU Institutional Review Board Training Series: Bots & Fraudulent Respondents
Welcome & Housekeeping

Welcome to the USU Institutional Review Board Spring 2024 Training Series!

Upcoming Training Dates:
April 8, 2024: Collecting Data on Children in Schools

Let us know what training topics you want to see addressed in Fall 2024!
https://research.usu.edu/irb/feedback
Welcome & Housekeeping

To ask a question, use the Q&A function at the bottom of this webinar screen. Anonymous questions are permitted.

All sessions will be recorded, and the recordings and/or slides from the presentation will be posted to the IRB’s website, which can be accessed at irb.usu.edu.
The Institutional Review Board
The Human Research Protection Program

VP for Research
Responsible for overseeing all aspects of USU's Human Subjects Research portfolio & ensuring appropriate access to resources for a well-functioning Human Research Protection Program (HRPP)

Human Research Protections Office
Manages the day-to-day aspects of implementing and overseeing the HRPP, including:
- Researcher training
- Coordination with COI, IBC, ICOI, SPO processes
- Receiving complaints, concerns, and questions from research participants

The IRB
Reviews all proposed human subjects research at Utah State University according to:
- Established ethical standards,
- Policies & procedures, and
- Best practices

Researchers
Responsible for carrying out and overseeing research with human participants in a manner that:
- Complies with the terms of IRB's review,
- Ensures adequate resources and training for the safe conduct of the research, and
- Takes proactive steps to ensure the health, safety, and well-being of research participants
Utah State University’s Institutional Review Board conducts its reviews according to two prevailing ethical standards:

**Belmont Report**
- Respect for Persons
- Justice
- Beneficence

**45 C.F.R. 46 (The Common Rule)**
- Subpart A: General Review standards
- Subparts C, D: Vulnerable Population Requirements
What/Who Are We Talking About?

“[I]ndividuals, groups, or computer processes (i.e. bots) participating in online, internet, or web-based data collection methods at a statistically significant level, such that data are or would be measurably distorted.”

Survey respondents who: a) are ineligible respondents due to the study specifications; b) take the survey repeatedly to either distort results or take advantage of incentives; and/or c) are potentially eligible but have responded in a way that may challenge the validity of survey results or noticeably distort research data.

The IRB’s Role in Managing Fraudsters

- Belmont Principles of Respect for Persons
  Identifying fraudulent respondents appropriately; crediting honest work as committed to at the start of the study

- Belmont Principle of Beneficence
  Minimize harms (wasted time, discredited user ratings)

- Belmont Principle of Justice
  Ensuring requirements for honest and complete work are understood by all participants, but especially those who might have a more difficult time understanding the requirements
The IRB’s Role in Managing Fraudsters

- Common Rule: Informed Consent
  Ensuring timely, accurate, and complete payment according to the informed consent document

- Common Rule: IRB Contact for Complaints
  Minimize harms (wasted time, discredited user ratings)

- Accreditation Standards: Resolving & Reporting Participant Complaints
  Ensuring requirements for honest and complete work are understood by all participants, but especially those who might have a more difficult time understanding the requirements
The IRB’s Role in Managing Fraudsters

- Institutional Concerns
  - Inaccurate or untimely payment decisions impact USU’s reputation in communities and platforms where online data collection occurs
  - Ineffective use of institutional resources (funds, survey platforms, etc.)
  - Quality and trustworthiness of the research produced
How to Protect Your Data Collection Efforts from Fraudulent Responders

- Deter
- Prevent
- Detect
- Remove

Targeted Recruitment

Compensation Approaches

Informed Consent
If you are using Qualtrics Fraud Protection or other kinds of attention checks, which are highly recommended for online studies (particularly with compensation), you must use this paragraph (which you can reformulate, but the gist must be captured): To ensure the integrity of the information we collect, this survey utilizes checks to prevent fraudulent responses. Failure to successfully navigate these checks will result in [termination of participation AND/OR nonpayment].

Risks & Benefits

Please list the circumstance(s) under which you would terminate a participant from the study, and how you will effectuate that termination.

Consider: incomplete participation, fraudulent responses to online studies, study disruption, discovery of previously undisclosed conditions or circumstances, etc. If a circumstance is not listed here, you may not terminate a participant from the study except as required to keep them or others safe, so be comprehensive in your disclosures here.
Prevention

- Multi-Step Screening
- IP Address Requirements
- Digital Tools
- Ballot Box Stuffing
- Qualtrics: RelevantID
Detection
