New Research Innovation & Impact Division

The Office of Research is excited to announce the new Research Innovation & Impact (RII) division! The RII division supports the lifecycle of research by combining Research Development, a new External Partnerships team, and Technology Transfer. These three RII teams, led by Executive Director Jeri Hansen, will assist faculty in finding funding and developing competitive proposals for research development, aid in developing partnerships with external entities (business/industry, government, private organizations, etc.) to further research, and support the translation of research into the marketplace.

The first RII event is the Research Summit: Research to Market Pipeline on October 21. We hope to see you there!

A website for the Research Innovation & Impact division will be launching soon.
